*Spiritual Snake Oil* S.C. Hitchcock, 2012-01-01 *Spiritual Snake Oil* shows that the same fallacies that plague religious apologetics also infect virtually all new age and spiritual writing Author Chris Edwards does this by dissecting the arguments and assertions of the most prominent new age icons and spiritual writers They include Robert Pirsig *Zen and the Art of Motorcycle Maintenance* James Redfield *The Celestine Prophecy* Deepak Chopra *Life After Death* Dinesh D Souza *Life After Death* Francis Collins *The Language of God* Rhonda Byrne *The Secret* and even Michael Crichton a surprising defender of New Age thinking As Edwards shows the same fallacies the same errors in argument show up time after time in the writings of these and virtually all other new age and spiritual writers In addition to explaining these fallacies in the chapters devoted to the individual authors Edwards devotes a final chapter *A Compendium of Fallacies* to outlining the tricks and deceptive practices common to illogical arguments

**Say What?** Joel T. Heinen, 2018-11-28 Religion is a funny thing Most people believe in one or another and assert that theirs is true Many religious people also assert that every other religion believed in by anyone else ranges from completely false to highly suspect There are religions that believe in many gods others that believe in one god and there are even religions that preach no gods There are also sects within religions that disavow other sects within the same religion There are religions that are extinct and new religions formed all the time The reformation of older religions is also ongoing What all religions seem to have in common are 1 supernatural beliefs that others don't believe and 2 absolutely no real demonstrable evidence that can be repeated and shown to others in support of any of their supernatural beliefs If you think about it religion truly is a funny thing in every sense of that word Many people define their religion to be the all encompassing paradigm of their existence that causes them to do completely virtuous altruistic things Yet religion also causes others who are equally or even more pious to commit mass murder And both have been true for many religions throughout history This volume takes a broad and satirical look at religions writ large mainly to question It's aimed largely at atheists and those on the fence but theists may be encouraged to read it too and question for themselves How did you acquire religion Why What do you believe Why Why not believe other equally implausible things that others do believe This volume is just a light hearted attempt to ask *C'est tout*

the results including the GOP's first Senate majority in twenty six years He shows how the Democrats were weakened by the demise of the New Deal coalition and a decline in public confidence while Republicans were bolstered by the growth of the conservative movement and by all that had gone wrong during the Carter presidency He also examines the creation of a Sunbelt coalition the growing influence of religious conservatives and the independent candidacy of John Anderson which held Reagan's majority to 51 percent and foreshadowed Ross Perot's 1992 run Reagan's victory marked a major turning point in American presidential history realigned the demographics of party affiliation throughout the nation especially in the nation's Sunbelt and gave conservatives their first real victory in their fight against Big Government Busch's book recaptures the people and events of that historic campaign and greatly enlarges our understanding of American politics from the 1960s to the present *Current Law Index* ,1999 The Reagan Effect John W.
