Defining the Boundaries of Disability Licia Carlson, Matthew C. Murray, 2021 This ground breaking volume considers what it means to make claims of disability membership in view of the robust Disability Rights movement the rich areas of academic inquiry into disability increased philosophical attention to the nature and significance of disability a vibrant disability culture and disability arts movement and advances in biomedical science and technology By focusing on the statement We are all disabled the book explores the following questions What are the philosophical political and practical implications of making this claim What conceptions of disability underlie it When if ever is this claim justified and when or why might it be problematic or harmful What are the implications of claiming we are all disabled amidst this global COVID 19 pandemic These critical reflections on the boundaries of disability include perspectives from the humanities social sciences law and the arts In exploring the boundaries of disability and the ways in which these lines are drawn theoretically legally medically socially and culturally the authors in this volume challenge particular conceptions of disability expand the meaning and significance of the term and consider the implications of claiming disability as an identity It will be of interest to a broad audience including disability scholars advocates and activists philosophers and historians of disability moral theorists clinicians legal scholars and artists

Understanding the Lived Experiences of Persons with Disabilities in Nine Countries Rune Halvorsen, Bjørn Hvinden, Julie Beadle Brown, Mario Biggeri, Jan Tøssebro, Anne Waldschmidt, 2017-12-01 Over the last three decades a number

of reforms have taken place in European social policy with an impact on the opportunities for persons with disabilities to be full and active members of society The policy reforms have aimed to change the balance between citizens rights and duties and the opportunities to enjoy choice and autonomy live in the community and participate in political decision making processes of importance for one s life How do the reforms influence the opportunities to exercise Active Citizenship This volume presents the findings from the first cross national comparison of how persons with disabilities reflexively make their way through the world pursuing their own interests and values The volume considers how their experiences views and aspirations regarding participation vary across Europe Based on retrospective life course interviews the volume examines the scope for agency on the part of persons with disabilities i e the extent to which men and women with disabilities are able to make choices and pursue lives they have reasons to value Drawing on structuration theory and the capability approach the volume investigates the opportunities for exercising Active Citizenship among men and women in nine European countries The volume identifies the policy implications of a process oriented and multi dimensional approach to Active Citizenship in European disability policy It will appeal to policymakers and policy officials as well as to researchers and students of disability studies comparative social policy international disability law and qualitative research methods

Institutional Violence and Disability Kate Rossiter, Jen Rinaldi, 2018-08-10 This was several times with that damn cribbage board I hate cribbage boards to this very day They never beat us on the arms or legs or stuff it was always on the bottom of the feet I couldn t figure it out Brian L Huronia Regional Centre Survivor Over the past two decades the public has borne witness to ongoing revelations of shocking intense and even sadistic forms of violence in spaces meant to provide care This has been particularly true in institutions designed to care for people with disabilities In this work the authors not only describe institutional violence but work to make sense of how and why institutional violence within care settings is both so pervasive and so profound Drawing on a wide range of primary data including oral histories of institutional survivors and staff ethnographic observation legal proceedings and archival data this book asks What does institutional violence look like in practice and how might it be usefully categorized How have extreme forms violence and neglect come to be the cultural norm across institutions What organizational strategies in institutions foster the abdication of personal morality and therefore violence How is institutional care the crucial first step in creating a culture that accepts violence as the norm This highly interdisciplinary work develops scholarly analysis of the history and importance of institutional violence and as such is of particular interest to scholars whose work engages with issues of disability health care law and policy violence incarceration organizational behaviour and critical theory

Citizenship Inclusion and Intellectual Disability Niklas Altermark, 2017-11-09 What happens when a group traditionally defined as lacking the necessary capacities of citizenship is targeted by government programs that have made citizenship inclusion their main goal Combining theoretical perspectives of political philosophy social theory and disability studies this book untangles the current state of Western intellectual disability

politics following the replacement of state institutionalisation by independent and supported living individual rights and self determination Taking its cue from Foucault's conception of biopolitics denoting the government of the individuals and the totality of the population its overarching argument is that the ambiguous positioning of people with intellectual disabilities with respect to the ideals of citizenship results in a regime of government that simultaneously includes and excludes people of this group On the one hand its members are projected to become ideal citizens via the cultivation of citizenship capacities On the other the right to live independently and by their own choices is curtailed as soon as they are seen as failing with respect to the ideals of reason and rationality Therefore coercion restraints and paternalism which were all supposed to end with deinstitutionalisation are still ingrained in services targeting the group In equal parts a theoretical work advancing debates of critical disability theory social theory and post structural philosophy as well as an empirical engagement with the history of intellectual disability politics and the ways in which present day politics target the group this book will be of interest to all students and scholars of disability studies disability politics and political theory

Geographies of Disability Brendan Gleeson, 1999 This book explores the relationship between space and disability explaining how space place and mobility shape the experiences of disabled people

The Routledge International Handbook of Disability Human Rights Hierarchies Stephen Meyers, Megan McCloskey, Gabor Petri, 2023-10-31 Disability is defined by hierarchy Regardless of culture or context persons with disabilities are almost always pushed to the bottom of the social hierarchy With the advent of the Convention on the Rights of Persons with Disabilities 2006 disability human rights seemingly provided a path forward for tearing down ableist social hierarchies and ensuring that all persons with disabilities everywhere were treated equally Despite important progress the disability human rights project not only remains incomplete but has often created new hierarchies among persons with disabilities themselves or across the human rights it promotes Certain groups of persons with disabilities have gained new voices while others remain silenced and certain rights are prioritized over others depending on what states international organizations or advocates want rather than what those on the ground need most This volume was inspired both by the continued need to expose human rights violations against persons with disabilities but to also explore the nuanced role that hierarchies play in the spread implementation and protection of disability human rights The enjoyment of human rights is not equal nor is the recognition of specific individuals and groups rights In order to change this situation inequalities across the disability human rights movement must be explored Divided into five parts Who counts as disabled Political social and cultural context Which rights on top whose rights on bottom Pushed to the periphery in the disability rights movement Representations of disability and comprised of 34 newly written chapters including case studies from the Anglophone Caribbean Bangladesh Bosnia Herzegovina China Ghana Haiti Hungary India Israel Kenya Latin America Poland Russia Scotland Serbia and South Africa and other countries this book will be of interest to all scholars and students of disability studies sociology human rights law and social policy

Disability, Avoidance and the Academy David

Bolt, Claire Penketh, 2017-07-14 Disability is a widespread phenomenon indeed a potentially universal one as life expectancies rise Within the academic world it has relevance for all disciplines yet is often dismissed as a niche market or someone else's domain This collection explores how academic avoidance of disability studies and disability theory is indicative of social prejudice and highlights conversely how the academy can and does engage with disability studies This innovative book brings together work in the humanities and the social sciences and draws on the riches of cultural diversity to challenge institutional and disciplinary avoidance Divided into three parts the first looks at how educational institutions and systems implicitly uphold double standards which can result in negative experiences for staff and students who are disabled The second part explores how disability studies informs and improves a number of academic disciplines from social work to performance arts The final part shows how more diverse cultural engagement offers a way forward for the academy demonstrating ways in which we can make more explicit the interdisciplinary significance of disability studies and by extension disability theory activism experience and culture Disability Avoidance and the Academy Challenging Resistance will interest students and scholars of disability studies education studies and cultural studies *The Routledge Handbook of Disability Activism* Maria Berghs, Tsitsi Chataika, Yahya El-Lahib, Kudakwashe Dube, 2019-10-28

The onslaught of neoliberalism austerity measures and cuts impact of climate change protracted conflicts and ongoing refugee crisis rise of far right and populist movements have all negatively impacted on disability Yet disabled people and their allies are fighting back and we urgently need to understand how where and what they are doing what they feel their challenges are and what their future needs will be This comprehensive handbook emphasizes the importance of everyday disability activism and how activists across the world bring together a wide range of activism tactics and strategies It also challenges the activist movements transnational and emancipatory politics as well as providing future directions for disability activism With contributions from senior and emerging disability activists academics students and practitioners from around the globe this handbook covers the following broad themes Contextualising disability activism in global activism Neoliberalism and austerity in the global North Rights embodied resistance and disability activism Belonging identity and values how to create diverse coalitions for rights Reclaiming social positions places and spaces Social media support and activism Campus activism in higher education Inclusive pedagogies evidence and activist practices Enabling human rights and policy Challenges facing disability activism The Routledge Handbook of Disability Activism provides disability activists students academics practitioners development partners and policy makers with an authoritative framework for disability activism

The New Political Economy of Disability Georgia van Toorn, 2021-02-22 This book addresses the ways in which individualised market based models of disability support provision have been mobilised in and across different countries through cross national investigation of individualised funding IF as an object of neoliberal policy mobility Combining rich theoretical and interdisciplinary perspectives with extensive empirical research the book provides a timely examination of the

policy processes and mechanisms driving the spread of IF amongst countries at the forefront of disability policy reform It is argued that IF s mobility is not attributable to neoliberalism alone but to the complex intersections between neoliberal and emancipatory agendas and to the transnational networks that have blended the two agendas in new ways in different institutional contexts The book shows how disability rights struggles have synchronised with neoliberal agendas which explains IF s propensity to move and mutate between different jurisdictions Featuring first hand accounts of the activists and advocates engaged in these struggles the book illuminates the consequences and risks of the dangerous liaisons and political trade offs that seemed necessary to get individualised funding on the policy agenda for disabled people It will be of interest to all scholars and students working in disability studies social policy sociology and political science more generally
