Disaster Communications In A Changing Media World Second Edition:

Disaster Communications in a Changing Media World George Haddow, Kim S Haddow, 2008-10-29 Communications is key to the success of disaster mitigation preparedness response and recovery Accurate information disseminated to the general public to elected officials and community leaders and to the media reduces risk saves lives and property and speeds recovery The ability to communicate is no longer an afterthought or a luxury timely communication is now as important as logistics or the pre deployment of materials Planning and controlling the flow of information before during and after a disaster will define your organization s credibility trustworthiness authority and effectiveness The emergence of new media like the internet e mail blogs text messaging cell phone photos and the increasing role played by first informers witnesses who now have the ability to transmit information immediately from the event are redefining the roles of government and media The government s historical role as gatekeeper is now an anachronism Traditional media s role as the sole conduit of reliable and officially sanctioned information has been eclipsed by the advent of new media The tools and rules of communications are evolving and disaster communications must evolve to capitalize on these changes and exploit the opportunities they provide Bloggers have the potential either to add to the chaos during a crisis or to help convey accurate data and report on local conditions Disaster communications must incorporate a way to manage their impact and if possible use them for the common good Finally even though the means to the end are evolving the goals the values and the underlying principles of effective disaster communication the need for transparency increased accessibility trustworthiness and reliability and to create partnerships with the media have not changed and need to be embraced along with the practical ability to convey information effectively Applies the principles of emergency management to communications during a disaster Covers terrorist incidents accidents and natural disasters like hurricanes and earthquakes Shows how to use blogs text messages and cell phone cameras as well as government channels and traditional media to communicate during a crisis

Social Media for Government Staci M. Zavattaro, Thomas A. Bryer, 2016-03-10 Social media is playing a growing role within public administration and with it there is an increasing need to understand the connection between social media research and what actually takes place in government agencies Most of the existing books on the topic are scholarly in nature often leaving out the vital theory practice connection This book joins theory with practice within the public sector and explains how the effectiveness of social media can be maximized The chapters are written by leading practitioners and span topics like how to manage employee use of social media sites how emergency managers reach the public during a crisis situation applying public record management methods to social media efforts how to create a social media brand how social media can help meet government objectives such as transparency while juggling privacy laws and much more For each topic a collection of practitioner insights regarding the best practices and tools they have discovered are included Social Media for Government responds to calls within the overall public administration discipline to enhance the theory practice connection giving

practitioners space to tell academics what is happening in the field in order to encourage further meaningful research into social media use within government
