Johnson, 2012-08-01 In the 1880s science witnessed a major shift Charles Darwin proposed his theory of evolution People dug up the first dinosaur fossils And the field of paleontology the study of ancient plants and animals emerged Othniel Charles Marsh and Edward Drinker Cope became enthralled with these new ideas discoveries and developments Both were determined to become world famous paleontologists When they met in 1863 they started off as friends But within a few years competition drove the men apart Each fought bitterly to discover more fossils name more species and publish more papers than the other In their haste to outdo each other they both produced some shoddy work The resulting confusion took many years to discover and correct and their toxic relationship crippled the field of paleontology for decades afterward However the competition also produced a wealth of fossils These laid a firm foundation for the field of paleontology and supported Darwin s theory of evolution Marsh s and Cope s discoveries generated keen public interest in prehistoric life and rich data for future generations of paleontologists This book explores the great rivalry between Marsh and Cope showing how it brought out the best and the worst in them while bringing humankind a brand new view of life on Earth **The Dinosaur Bone Battle Between O.C. America many of which can still be seen in museums around the world The captivating tale of these scientists unfolds in this absorbing book which also includes a timeline sidebars and fact boxes offering much information about paleontology dinosaurs and excavations as well as photographs and images to further elucidate essential science concepts **The Bone Wars** Jane Kurtz,2023-11-21 Discover the true story of the race between two paleontologists to find the best dinosaur fossils in this fascinating fast paced nonfiction picture book Who will win the Bone Wars Did you know that many of the dinosaur skeletons you see in museums are rooted in a scientific battle between two paleontologists O C Marsh and Edward Cope met in 1863 and bonded over their shared love of fossils becoming the best of friends until the day Marsh discovered an error in Cope s work and the Bone Wars began Marsh and Cope stopped collaborating and started competing excavating fossils as fast as they could and trying to find the most important never before seen discoveries They each wanted the biggest best dinosaur bones And fast They used code names and disguises they snoopd and tricked and did everything possible to keep their finds secret The race was messy and there were many mistakes along the way but in the end Marsh and Cope discovered all kinds of new dinosaur skeletons to share with the world fossils we still get to see today The Gilded Dinosaur Mark Jaffe,2000 It was an age of counterfeit giants avaricious robber barons corrupt politicians intrepid pioneers fierce Indian chiefs and dinosaurs The second half of the nineteenth century the so called Gilded Age was a time when Americans were exploring the West and building a nation that would stretch from coast to coast It was also a time of scientific ferment Charles Darwin had shaken the very foundations of Victorian society with his theory of evolution by natural selection and scientists across the civilized world were locked in a great battle over Darwin s idea While the debate raged in Europe the hunt for hard evidence increasingly focused on the American West with its grand mesas buttes and badlands We must turn to the New World if we wish to see in perfection the oldest monuments of earth s history advised Sir Charles Lyell the father of modern geology after a visit to America Certainly in no other country are these ancient strata developed on a grander scale or more plentifully charged with fossils Could the answer to the history of life and the proof of evolution be found in those fossils That was the question that two young American paleontologists Edward Drinker Cope and Othniel Charles Marsh set out to answer But what began as a friendly contest quickly turned into bitter rivalry that would spill over into American science and politics and rage relentlessly for nearly three decades Cope and Marsh would battle on the prairies in the halls of Congress in science journals and in the popular press Both wealthy men they launched lavish western expeditions and raced across the plains and mountains searching for the remains of the magnificent beasts that once inhabited the continent Along the way they would encounter George Custer Sitting Bull Buffalo Bill and Red Cloud Among the most remarkable fossil discoveries of Cope and Marsh are a bevy of dinosaurs including some of the best known beasts the Triceratops the Stegosaurus the Camarasaurus and the Brontosaurus Even today Marsh holds the record for dinosaur discoveries Just as valuable however were some of Marsh s discoveries of ancient mammals and birds that provided the first

real proof of Darwin's theory The best support for the theory in twenty years the great Darwin himself proclaimed The tale of Cope and Marsh is also the story of the rise of American science When their story begins just after the Civil War America was an intellectual backwater with eminent scientists snookered by the great fake stone statue The Cardiff Giant a hoax unmasked by Marsh But even as Cope and Marsh waged war they both fought to build up American science and its scientific institutions Yet despite their discoveries and their Gilded Age celebrity the names of Cope and Marsh have faded into the recesses of the library and archive In The Gilded Dinosaur Mark Jaffe exhumes from those archives the notes journals and letters of Cope and Marsh to reanimate and retell one of the keenest rivalries in the history of science **The**

Tooth and Claw Deborah Noyes, 2019-04-30 The tale of the epic rivalry between two foundational paleontologists to find bigger and better bones in the American West perfect for readers of Steve Sheinkin and Candace Fleming Today we take for granted the idea that dinosaurs once roamed the earth But two hundred years ago the very concept of an extinct species did not exist When an English scientist proposed in 1841 that Dino Saur's terrible lizards had come and gone it was only a theory a new way of explaining the dragon and giant bones scattered across the globe But when proof turned up seventeen years later it was not only incontrovertible it was massive *Tooth and Claw* tells the story of the feverish race between two brilliant driven and insanely competitive scientists Edward Drinker Cope and Othniel Charles Marsh to uncover more and more monstrous fossils in the newly opened Wild West Between them they discovered dozens of major dinosaur species and established the new discipline of paleontology in America But their bitter thirty year rivalry a war waged on wild plains and mountains in tabloid newsprint and in Congress dramatically wrecked their professional and private lives even as it brought alive for the public a vanished prehistoric world

The Second Jurassic Dinosaur Rush Paul D. Brinkman, 2024-05-31 The so called Bone Wars of the 1880s which pitted Edward Drinker Cope against Othniel Charles Marsh in a frenzy of fossil collection and discovery may have marked the introduction of dinosaurs to the American public but the second Jurassic dinosaur rush which took place around the turn of the twentieth century brought the prehistoric beasts back to life These later expeditions which involved new competitors hailing from leading natural history museums in New York Chicago and Pittsburgh yielded specimens that would be reconstructed into the colossal skeletons that thrill visitors today in museum halls across the country Reconsidering the fossil speculation the museum displays and the media frenzy that ushered dinosaurs into the American public consciousness Paul Brinkman takes us back to the birth of dinomania the modern obsession with all things Jurassic Featuring engaging and colorful personalities and motivations both altruistic and ignoble *The Second Jurassic Dinosaur Rush* shows that these later expeditions were just as foundational if not more so to the establishment of paleontology and the budding collections of museums than the more famous Cope and Marsh treks With adventure intrigue and rivalry this is science at its most swashbuckling

The Bone Wars Nicky Dee, 2018-05 The Great Dinosaur Rush was a time in U S history when the hunt for dinosaurs really began Would the two gentlemen scientists who led the hunt play nicely and work together or would their desperation to be the best lead them to behave very very badly
