Gender And Sociality In Amazonia How Real People Are Made:

Gender and Sociality in Amazonia Cecilia McCallum, 2020-05-11 This is the first book to focus directly on gender in Amazonia for nearly thirty years. Research on gender and sexual identity has become central to social science during that time, but studies have concentrated on other places and people, leaving the gendered experiences of indigenous Amazonians relatively unexplored. McCallum explores little-known aspects of the day-to-day lives of Amazonian peoples in Brazil and Peru. Taking a closer look at the lives of the Cashinahua people, the book provides fascinating insights into conception, pregnancy, and birth, naming rituals, and initiation ceremonies; concepts of space and time; community and leadership; exchange and production practices; and the philosophy of daily life itself. Through this prism, it shows that in fact gender is not merely an aspect of Amazonian social life but its central axis and driving force. Gender does not just affect personal identity but has implications for the whole of community life and social organization. The author illustrates how gender is continually created and maintained and how social forms emerge from the practices of gendered persons in interaction. Throughout their lives, people are being made in this part of the Amazon, and the whole of social organization is predicated on this conception. The author reveals the complex interrelationships that link gender distinctions with the body systems of exchange and politics. In so doing, she develops a specific theoretical model of gender and sociality that reshapes our understanding of Amazonian social processes. Building on the key works from past decades, this book challenges and extends current understandings of gender, society, and the indigenous people of Amazonia.

The Social Life of Achievement Nicholas J. Long, Henrietta L. Moore, 2013-11-01 What happens when people achieve Why do reactions to achievement vary so profoundly And how might an anthropological study of achievement and its consequences allow us to develop a more nuanced model of the motivated agency that operates in the social world These questions lie at the heart of this volume Drawing on research from Southeast Asia Europe the United States and Latin America this collection develops an innovative framework for explaining achievement s multiple effects one which brings together cutting edge theoretical insights into politics psychology ethics materiality aurality embodiment affect and narrative In doing so the volume advances a new agenda for the study of achievement within anthropology emphasizing the significance of achievement as a moment of cultural invention and the complexity of the achiever as a subject position

Under the canopy Marianne Schmink, Marliz Arteaga Gómez-García, 2015-06-08 Despite the importance of forests for global processes and the tradition of forest management by local Amazonian peoples there is not much available literature on gender and forests in the Amazon region Yet gender roles and relationships are important components of key emerging forest related issues such as climate change and the differential risks and opportunities faced by women and men in different contexts This paper reviews recent literature in English Spanish and Portuguese that addresses gender and forests in Amazonia focusing on property rights in Amazonian territories and

communities diverse and changing gender relations forest management programs and women s participation in social movements and organizations The review finds significant historical sociocultural and material barriers to gender equity and to women s full participation in sustainable management of Amazonian forests and a relative lack of focus on gender in forest management programs despite promising examples The most important finding was that over the past two decades women from different Amazonian social groups have become increasingly organized enhancing their rights levels of participation and empowerment More research is needed to understand the variability of gender relations and rights in different Amazonian contexts and how they are changing Research is also needed to understand and support efforts to improve gender equity in rights to resources and income and participation in key community and societal decisions on the future of Amazonian forests and their peoples
