MULTICONTACT AUXILIARY RELAY

Type HFA51

DESCRIPTION

INTRODUCTION

The HFA51A and HFA51B relays are instantaneous, hinged armature, multi-contact, auxiliary relays. They have six electrically separate contact circuits adaptable for either circuit opening or circuit closing application. This arrangement permits a number of operations to be performed simultaneously.

The HFA51A and HFA51B relays are available for front or back connection. The front connected relays are suitable for surface mounting only.

The back connected relays are suitable for either surface mounting or semi-flush mounting; a steel flange is necessary for the latter. There are two types of flanges available: one provides mounting with normal cover; one provides mounting with the drawout-case type cover.

CHARACTERISTICS

The HFA51A relay is self reset and has an instantaneous dropout.

The HFA51B relay is hand reset by means of a plunger assembly installed through the transparent cover.

Unless the relays are ordered with a specific contact arrangement, they will be shipped with six circuit closing contacts (Code 60). The contact arrangement can be easily changed to provide any of the combinations shown in Table I.

RATINGS

The Type HFA relays are available with coil ratings for standard voltages up to 575 volts at 25, 50, or 60 cycles and up to 250 volts d-c.

The current closing rating of each contact is 30 amperes. The current carrying rating is 12 am-

peres continuous or 30 amperes for one minute. Table II lists the non-inductive interrupting capacity of each contact.
