Genealogy Modern Architecture Comparative Critical:

Genealogy of Modern Architecture Kenneth Frampton, 2015-04-10 A Genealogy of Modern Architecture is a reference work on modern architecture by Kenneth Frampton one of today's leading architectural theorists. Conceived as a genealogy of twentieth-century architecture from 1924 to 2000, it compiles some sixteen comparative analyses of canonical modern buildings ranging from exhibition pavilions and private houses to office buildings and various kinds of public institutions. The buildings are compared in terms of their hierarchical spatial order, circulation structure, and referential details. The analyses are organized so as to show what is similar and different between two paired types, thus revealing how modern tradition has been diversely inflected. Richly illustrated, A Genealogy of Modern Architecture is a new standard work in architectural education.

Modern Architecture Kenneth Frampton, 2020-09-01 An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton. Kenneth Frampton's highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980. Starting with the cultural developments since 1750 that drove the modern movement, moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of international celebrity architects, this book is the definitive history of modern architecture. For this extensively revised and updated fifth edition of *Modern Architecture*, Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably and create structures that will withstand changing climates. This new edition features completely redesigned interiors and an updated and expanded bibliography, making this volume more indispensable than ever.

Architecture and the Public World Kenneth Frampton, 2024-01-25 This book brings together Kenneth Frampton's essays from the 1960s to today, which epitomize his reflections on the historical, theoretical, and entanglements of architecture with place, the public realm, cultural identity, urban landscape, and environment, and the political question of the predicament of architecture in the new Millennium. The essays explore Frampton's contention that architecture's imperative is to assume a significant responsibility for the edification and stewardship of the Arendtian public world. One of the most theoretically sophisticated and politically committed architectural thinkers, Frampton's work breaks emphatically with the limits and norms of much contemporary practice and restores a sense of richness and social consequence to architecture's unfinished project while offering abiding lessons not only for architecture but for social, cultural, and design criticism alike.

Rethinking Modernity Antigoni Katsakou, 2020-05-31 This book proposes alternative interpretations of broadly debated concepts within architectural modernity. Bringing into view the work of lesser-known architects from across the globe alongside previously unexplored aspects of mainstream masters of the Modern, *Rethinking Modernity* puts forward a compelling case for the range and diversity of architectural projects encompassed by this term. Exploring themes such as the use of colour, materials, ornament, local traditions, and identities, *Rethinking Modernity* challenges readers to build a better

understanding of a crucial moment in architectural history and of design trends shaping the present day production of the built environment Complementing the RIBA Publishing titles *Redefining Brutalism* and *Revisiting Postmodernism* this book sits within a series of books aiming to explore new interpretations of well loved architectural movements richly illustrated with rarely seen archive photography and lesser known projects

The Rise of Awards in Architecture Jean-Pierre Chupin, Carmela Cucuzzella, Georges Adamczyk, 2022-09-06 This book is the first scientific study to focus on awards in architecture and the built environment investigating their exponential growth since the 1980s The celebration of excellence in architecture and related fields remains a phenomenon on which there is strangely little scientific scrutiny What is to be understood from the plethora of award winning projects award winning buildings and awarded professional practices in the built environment year after year Glossy images partake in an intense ballet at every local regional national or international award ceremony and they are meant to embody proofs of architectural excellence However it is necessary to take a critical distance to question what awards are meant to embody symbolize and perhaps measure Each of the 10 chapters in this volume is centered on one question related to themes as varied as the comparison of Pritzker and Nobel Prizes the Prix de Rome the redefinition of quality through awards green awards and sustainability the multiplication of sustainable awards heritage awards architecture book awards the awarding of school architecture awards as mediations and awards as pedagogical devices Many fields once consolidated have featured a sharp increase in related prizes The original data compiled and summarized in 4 appendices cover more than 150 award granting organizations in some 30 countries Our inventory includes upwards of 24 000 prizes awarded at more than 3 100 events the earliest of which is the first instance of Western architecture s seminal Grand Prix de Rome in France in 1720 A history of contemporary architecture is thus written through press releases that praise the merits of the heroes as much as their works and achievements And while awards can be vehicles that propel architecture forward they can also be Trojan horses in an era that is constantly on the lookout for event driven products small and big news and brand imaging

Designing in Dark Times Virginia Tassinari, Eduardo Staszowski, 2020-11-12 The architectural historian and critic Kenneth Frampton never recovered from the force of Hannah Arendt s teaching at The New School in New York The philosopher Richard J Bernstein considers her the most perceptive political theorist and observer of dark times a concept which drawing from Brecht she made her own Building on the revival of interest in Hannah Arendt and on the increasing turn in design towards the expanded field of the social this unique book uses insights and quotations drawn from Arendt s major writings *The Human Condition* *The Origins of Totalitarianism* *Men in Dark Times* to assemble a new kind of lexicon for politics designing and acting today Taking 56 terms from *Action Beginnings* and *Creativity through Mortality* *Nativity and Play to Superfluity* *Technology and Violence* and inviting designers and scholars of design world wide to contribute *Designing in Dark Times An Arendtian Lexicon* offers up an extraordinary range of short essays that use moments and quotations from Arendt s thought as the starting points for reflection on how these

terms can be conceived for contemporary design and political praxis Neither simply dictionary nor glossary the lexicon brings together designing and political philosophy to begin to create a new language for acting and designing against dark times

Architecture and the Public World Kenneth Frampton, 2024-01-25 This book brings together Kenneth Frampton's essays from the 1960s to today which epitomize his reflections on the historical theoretical entanglements of architecture with place the public realm cultural identity urban landscape and environment and the political question of the predicament of architecture in the new Millennium The essays explore Frampton's contention that architecture's imperative is to assume a significant responsibility for the edification and stewardship of the Arendtian public world One of the most theoretically sophisticated and politically committed architectural thinkers Frampton's work breaks emphatically with the limits and norms of much contemporary practice and restores a sense of richness and social consequence of architecture's unfinished project while offering abiding lessons not only for architecture but for social cultural and design criticism alike
