Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international
network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher
education at something a level approaching large scale impact By offering a communication venue that attracts and enhances
much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the
conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design
methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we
wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own
practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of
studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive
pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the
implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams
conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely
positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and
the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design
profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny
amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in
an open access format that we may contribute to the development of new forms of practitioner researcher interactions that
promote co design in pedagogical innovation Selection of Recent Books Published in Great Britain 1940-Apr. 1941, 1976
