Everywherenowhere Gender Mainstreaming In Development Agencies:

Everywhere/nowhere Rebecca Tiessen, 2007 Shows how development agencies have responded to the need for gender equality at all levels of operation Scrutinizes the efficacy of gender mainstreaming's thirty year history Gender mainstreaming emerged in early gender and development work and gained strength following the 1975 Conference on Women in Mexico City After three decades of gender and development approaches and a more recent emphasis on gender mainstreaming Everywhere Nowhere presents a timely reflection on the challenges and opportunities development agencies have faced as they attempt to translate gender mainstreaming policies into practice Reports on gender mainstreaming within development agencies tend to concentrate on technical solutions with little attention to the political changes necessary for transforming the mainstream Technical solutions such as quantitative information about the number of female staff members hired or the allocation of a certain amount of resources to gender related activities are more frequently reported and more easily measured An emphasis on technical solutions has resulted in limited impact within organizations and minimal changes to gender inequitable relations Development agencies and their staff members are however finding innovative or subtle strategies to transform the mainstream through networking coalition building and leadership initiatives This book examines these approaches and analyses their contributions to gender mainstreaming

Rondinelli,John M. Heffron,2009 Although the extraordinary leadership that stimulated European recovery efforts in the late 1940s and early 1950s is now widely celebrated as a model for international development assistance the role of leadership in development is too often taken for granted Rondinelli and Heffron argue persuasively that leadership is the hallmark of almost every successful effort at international development since the late 1940s and that its absence is the underlying cause of most development failures Leadership for Development examines fundamental issues the tools leaders use to achieve development goals how culture and interdependence among governments and organizations affects leadership styles where leaders get their advice from experts non experts academic or non academic elites and if it matters whether transformational or transactional leadership styles are more effective and the lessons that can be drawn from examining the traits of successful leaders Focusing largely on the Pacific Basin region and Latin America the book offers valuable case studies for development practitioners looking to increase their effectiveness in a highly interdependent global society *Twinning Faith and Development* Tara Hefferan,2007 One of the first in depth studies about grassroots to grassroots development assistance and development spurred by non professionals Looks at how development is perceived and practiced by members of a Catholic parish in the US Twinning Faith and Development documents the operation of a project in which two Catholic churches one in the US and one in Haiti partner to spur development in Haiti Little is known about the functioning of grassroots initiatives led by those without formal training or professional experience in conventional development even though these direct linkages between citizens in the global north and south are becoming prominent and important channels for international development More than 350 parishes in North America currently work with parish sisters in Haiti alone through partnerships

called twinning Hefferan explores development as it is conceived designed and implemented by those outside the conventional aid industry those not considered to be development experts She looks at both twinning s failings and its possibilities as an alternative to conventional development practices **Global Environmental Challenges** O.P.
