Mr. Robert Duncan on Evolution in Naval Architecture During the Reign of Queen Victoria (Classic Reprint)

Robert Duncan, 2018-02-20 Excerpt from Mr Robert Duncan on Evolution in Naval Architecture During the Reign of Queen Victoria This ten breadths limit became almost a rule for nearly twenty years but within the last ten years the researches of the late Mr Froude in his experiments on the models of ships of war to determine the effect of proportions and form on resistance and speed have had the effect of causing a reaction in favour of greater breadth even for the highest speed types and this reaction has affected the lower types to such a degree that the length of an ordinary cargo steamer in proportion to breadth is now very little over the proportion common to the largest iron sailing ships of this time About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
