Herron, Scott Freeman, Jason A. Hodin, Brooks Erin Miner, Christian A. Sidor, 2015 Enhanced by the most up to date information available including a text specific web site this book provides coverage of both microevolution and macroevolution through a variety of taxonomic groups It focuses throughout on phylogenetic trees By presenting evolutionary biology as a dynamic ongoing research effort and organizing discussions around questions this best selling text helps students think like scientists as they learn about evolution The authors convey the excitement and logic of evolutionary science by introducing principles through recent and classical studies and by emphasizing real world applications In the Fifth Edition co author Jon Herron takes the lead in streamlining and updating content to reflect key changes in the field The design and art program have also been updated for enhanced clarity

**Biosocial Evolutionary Analysis** Jonathan H. Turner, Alexandra Maryanski, 2024-01-18 This authoritative book proposes a methodological and theoretical strategy for developing sociological explanations of the socio cultural universe Jonathan H Turner and Alexandra Maryanski discuss the problems that persist in explaining the socio cultural universe using only biological and psychological approaches and outline new strategies for understanding the evolution of human beings and their biological nature The Evolutionary Analysis of Economic Policy Pavel Pelikán, Gerhard Wegner, 2003 Traditional doctrines of economic policy have largely failed to address the fact that human economies are evolving complex adaptive systems rather than equilibrating mechanisms This volume represents a step towards a more evolutionary approach to economic policy Evolution and Design of Institutions Christian Schubert, Georg Von Wangenheim, 2006-09-27 This book comprises nine papers approaching designed institutions and their interplay with spontaneous institutions from various angles While the evolution of spontaneous institutions is quite well understood in economic thinking the development of consciously designed institutions has been examined much less In new institutional economics public choice and law and economics the interaction between changing preferences and spontaneously evolving institutions on the one hand and the evolution of designed institutions as e g legal systems on the other hand has largely been ignored A number of top class international contributors have been assembled to study this phenomenon including Viktor Vanberg Bruno Frey Elinor Ostrom and Francesco Parisi *Approaches to Plant Evolutionary Ecology* G.P. Cheplick, 2015-06-01 Plant evolutionary ecology is a rapidly growing discipline which emphasizes that populations adapt and evolve not in isolation but in relation to other species and abiotic environmental features such as climate Although it departs from traditional evolutionary and ecological fields of study the field is connected to branches of ecology genetics botany conservation and to a number of other fields of applied science primarily through shared concepts and techniques However

most books regarding evolutionary ecology focus on animals creating a substantial need for scholarly literature with an emphasis on plants *Approaches to Plant Evolutionary Ecology* is the first book to specifically explore the evolutionary characteristics of plants filling the aforementioned gap in the literature on evolutionary ecology Renowned plant ecologist Gregory P Cheplick summarizes and synthesizes much of the primary literature regarding evolutionary ecology providing a historical context for the study of plant populations from an evolutionary perspective The book also provides summaries of both traditional common gardens reciprocal transplants and modern molecular genetic approaches used to address questions about plant adaptation to a diverse group of abiotic and biotic factors Cheplick provides a rigorously written introduction to the rapidly growing field of plant evolutionary ecology that will appeal to undergraduate and graduate students with an interest in ecology and evolution as well as educators who are teaching courses on related topics

*A Voice in the Wilderness* Professor Joseph L Graves Jr., 2022-09-13 Why understanding evolution the most reviled branch of science can help us all from fighting pandemics to undoing racism Evolutionary science has long been regarded as conservative a tool for enforcing regressive ideas particularly about race and gender But in *A Voice in the Wilderness* evolutionary biologist Joseph L Graves Jr once styled as the Black Darwin argues that his field is essential to social justice He shows for example why biological races do not exist He dismantles recent work in human biodiversity seeking genes to explain the achievements of different ethnic groups He decimates homophobia sexism and classism as well As a pioneering Black biologist a leftist and a Christian Graves uses his personal story his journey from a child of Jim Crow to a major researcher and leader of his peers to rewrite his field *A Voice in the Wilderness* is a powerful work of scientific anti racism and a moving account of a trailblazing life

*Theistic Evolution* J. P. Moreland, Stephen C. Meyer, Christopher Shaw, Ann K. Gauger, Wayne Grudem, 2020-06-20 Winner of the ECPA Book of the Year Award for Bible Reference Works Many prominent Christians insist that the church must yield to contemporary evolutionary theory and therefore modify traditional biblical ideas about the creation of life They argue that God used albeit in an undetectable way evolutionary mechanisms to produce all forms of life Featuring two dozen highly credentialed scientists philosophers and theologians from Europe and North America this volume contests this proposal documenting evidential logical and theological problems with theistic evolution making it the most comprehensive critique of theistic evolution yet produced Explains why theistic evolution is not congruent with a biblical worldview Features nineteen essays written by well known experts in their fields Designed to be used as a textbook for courses on religion and evolution Accessible for those without expertise in the subject
