*Exact Measurements in Education* James LeRoy Stockton, 1915      *American Education* ,1912      **Educational Measurements (Classic Reprint)** Daniel Starch, 2018-03-18 Excerpt from Educational Measurements The sole purpose of standardized measurements is to refine these judgments to make them more accurate and objective to express them in terms of known units of a definable character so that we may be able to say for example that a pupil can read three words per second of a certain passage and to report so and so much of it that he knows the English meaning of 2000 Latin words and can translate without error sentences of specified difficulty If there are any products or by products of education which are too subtle to be distinguished or judged as existing in greater or less amounts or as having higher or lower quality we may be suspicious of their actual existence Any quality or ability of human nature that is detectable is also measurable It remains only to discover more and more accurate means of measurement About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      *Educational Measurement* Robert L.
