Evolution And Empathy The Genetic Factor In The Rise Of Humanism:

Evolution and Empathy Milton E. Brener, 2015-05-12 This book applies new scientific research in the fields of biology and genetics to an empirical study of the Greco Roman civilizations and the European Renaissance These two periods were remarkable in part because of the dominance of empathy and humanism in the philosophical thought of each era Both periods were preceded by the influx of many populations and genetic lines a circumstance this book treats as not coincidental but probably causative The author cites the expression of new genetic combinations in these periods as evidence that genetic evolution can play a large part in the development of new philosophical concepts as manifested in these two periods The author explains that humanistic traits seem to rise and fall in lockstep throughout human history directly or indirectly correlating with changing genetic underpinnings

Evolution and Empathy Milton E. Brener, 2008-05-23 This book applies new scientific research in the fields of biology and genetics to an empirical study of the Greco Roman civilizations and the European Renaissance These two periods were remarkable in part because of the dominance of empathy and humanism in the philosophical thought of each era Both periods were preceded by the influx of many populations and genetic lines a circumstance this book treats as not coincidental but probably causative The author cites the expression of new genetic combinations in these periods as evidence that genetic evolution can play a large part in the development of new

philosophical concepts as manifested in these two periods The author explains that humanistic traits seem to rise and fall in lockstep throughout human history directly or indirectly correlating with changing genetic underpinnings

Wagner and Schopenhauer Milton E. Brener, 2014-04-04 Most who write about Wagner s operas claim that the works of Arthur Schopenhauer had a huge effect on them The influence has Brener believes been vastly overstated The most detailed exposition of that alleged influence is by Bryan Magee In his Tristan Chord Magee details the bases for what are often by others unsupported conclusions Familiar with both the important writings of Schopenhauer and the works of Wagner Brener is among the few capable of a thorough analysis and factual response to Magee s claims His conclusions backed with primary sources stands almost alone in opposition to accepted dogma

Deceptive Fictions Ulrike Tancke, 2015-06-18 Deceptive Fictions Narrating Trauma and Violence in Contemporary Writing explores the widespread narrative concern with trauma and violence and their interactions with identity meaning ethics history memory and various other related issues in a selection of novels by prolific contemporary British and Irish writers Interrogating the strategic functions of trauma and violence the book argues that these texts can be read as counter narratives to or a backlash against still prevalent critical paradigms informed by poststructuralist and postmodern thought Trauma and violence are invoked as narrative tools to communicate the centrality of the body and of biological and material constraints on human actions This emphasis on reality

and the experiential ties in with the novels consistent focus on the individual as an ethical agent and originator of meaning In so doing they signal a move in contemporary fiction towards a textual practice that can most fruitfully be approached along the lines of an individualistic evolutionary corporeal and experiential narratology which self consciously reflects on the manipulative potentials of narrative

Walking Through Walls and Other Impossibilities Milton E Brener, 2011-06-09

The goal of the aliens among us is not the study of Earth for purely academic purposes It is something more vital to the aliens and more portentous for us The picture that emerges from much research makes sense of several aspects of the alien presence previously quite puzzling They apparently are a dying race inhabiting a dying planet They have undoubtedly mastered physical forces and phenomena of which we have not even dreamed But it has come at a terrible cost Their emotional life has been all but lost existing only as a faint remnant from a long distant past They may pity our hopelessly primitive technology but they envy us our robust emotional life Like all living things everywhere they live for the perpetuation of their genes They do not hate us nor do they seek our destruction They seek to create a race of hybrids combining their scientifically superior minds with our rich emotional makeup The ridicule of the entire subject by the government and other forces fearful of upheaval in our society has aggravated the suffering of those chosen and victimized by the aliens who apparently seek ineptly sometimes to minimize it The author combines this scholarly approach with an almost folksy narrative style to make *Walking Through Walls* a very readable and approachable treatise on the phenomena as good as any book on the subject and far more skillfully written than most including those Brener has referenced most frequently Bud Hopkins *Intruders* and Philip Corso's *The Day after Roswell* Blue Ink Review

Rock Art of the Qsur and 'Amour Mountains, Algeria Ahmed Achrafi, 2023-01-06 It may be true as Paul Valery said that the painter takes his body with him but it is almost certain that artists leave some of their bodies in their art This book studies the embodied intentionality inscribed in the works of the artists of the Qsur and Amour mountains in Algeria It retraces the aesthetic gestures of these artists revealing sounds they heard tactile and kinesthetic interactions they experienced and emotions they felt as they recorded the distress and pain of some animals Combining naturalist style skilful composition and spatial features these artists often gave their art the form of installation where induced motion and parallax flow create immersive experiences Using continuous line technique they created monumental objects and intricate labyrinthine forms

One Health Michael W. Fox, 2025-03-03 This collection of reflective critical philosophical and practical chapters represents the author's 60 years as a veterinarian ethologist and bioethicist The rising incidence of zoonotic diseases from farmed animals and wildlife in the expanding human population and so called reverse zoonoses where humans are infecting other species are existential concerns These concerns are linked with anthropogenic climate change and our impact on ecosystems which threaten biodiversity and the health and future of *Homo sapiens* and many other species These interconnected issues are examined in this book broadening the scope and agenda of what is currently more narrowly practiced as preventive medicine The author

calls for greater emphasis on holistic preventive health care maintenance in response to the escalating costs of human and companion animal health problems the welfare of factory farmed animals and endangered status of many wild species Our species now faces a complex existential crisis that must be addressed in an interdisciplinary way because there are multiple contributing factors factors that call for the insights of science and bioethics Fearlessly tackling contentious issues and wicked problems Dr Michael W Fox offers an integrated perspective of what One Health looks like on the ground *PALE SKIN, GIANTS, AND THE GREAT TRANSITION* MILTON E. BRENER,2013-01-17 This book Milton Brener s third on the subject of UFOs and extraterrestrials is a giant leap He delves into an analysis of much current scientific evidence that appears to add credence to claims of early hybridization of the human race It is an entirely new and novel approach but a very readable and one It is a challenge to readers to think constructively of the new and novel It revolves around the coalescence beginning about fifty thousand years ago of several significant and scientifically proven occurrences One is the beginning of the pale skin tone of Europeans Brener systematically dismantles the accepted scientific explanation for it and drives home the fact that the only other living creatures with similar skin tone are the extraterrestrials often known to many witnesses of high credibility as Nordics Unlike other ETs these Nordics look like us though some are said to be remarkably tall and also unlike others leave the contactees with very positive feelings Another major occurrence the great transition was the relatively sudden appearance of modern behavior including artistic genius timekeeping and creation of musical instruments The book is truly a tour de force The Mankind Quarterly Council for Social and Economic Studies (U.S.),2007

Psychology Dennis Coon,2007 In a course where professors are frequently confronted by students who haven t actually read their textbooks this text offers a solution The shortest most succinct of the books written by Dennis Coon PSYCHOLOGY A JOURNEY presents psychology in a way that sparks readers curiosity insights imagination and interest getting students hooked on psychology and eager to read on The first author to integrate the proven SQ4R survey question read recite relate and review active learning system into a psychology textbook Coon helps readers grasp major concepts develop a broad understanding of psychology s diversity and see for themselves how psychology relates to the challenges of everyday life Because readers become actively involved with the material they develop a basic understanding of psychology that they take with them into their future courses and careers Conference Papers Index ,1987 *Evolutionary humanism* Julian Huxley, *The Bonobo and the Atheist* Frans de Waal,2013-03-18 In this lively and illuminating discussion of his landmark research esteemed primatologist Frans de Waal argues that human morality is not imposed from above but instead comes from within Moral behavior does not begin and end with religion but is in fact a product of evolution For many years de Waal has observed chimpanzees soothe distressed neighbors and bonobos share their food Now he delivers fascinating fresh

evidence for the seeds of ethical behavior in primate societies that further cements the case for the biological origins of human fairness Interweaving vivid tales from the animal kingdom with thoughtful philosophical analysis de Waal seeks a bottom up explanation of morality that emphasizes our connection with animals In doing so de Waal explores for the first time the implications of his work for our understanding of modern religion Whatever the role of religious moral imperatives he sees it as a Johnny come lately role that emerged only as an addition to our natural instincts for cooperation and empathy But unlike the dogmatic neo atheist of his book s title de Waal does not scorn religion per se Instead he draws on the long tradition of humanism exemplified by the painter Hieronymus Bosch and asks reflective readers to consider these issues from a positive perspective What role if any does religion play for a well functioning society today And where can believers and nonbelievers alike find the inspiration to lead a good life Rich with cultural references and anecdotes of primate behavior *The Bonobo and the Atheist* engagingly builds a unique argument grounded in evolutionary biology and moral philosophy Ever a pioneering thinker de Waal delivers a heartening and inclusive new perspective on human nature and our struggle to find purpose in our lives

Apes or Angels? Cornelius J. Troost, 2007-03-16 APES or ANGELS A Summary For many readers this book will be a mind altering experience It has a thesis that is a challenge to the conventional thinking of most Christians and their counterparts the secular humanists It offends both for very good reasons It speaks the truth about Darwin s views on human origins and race Contrary to the beliefs of most academicians and educated readers Darwin had two dangerous ideas instead of one Daniel Dennett was perfectly right about the first which was the notion that natural selection operated in a way that precluded explanatory intrusions from outside the natural world In other words metaphysics has no place in biological explanation Things spiritual like vitalism and finalism are simply inapplicable to evolutionary biology The second idea is rarely mentioned in politically correct America that the human races are different in sometimes significant ways Indeed inequality is a normal condition of nature Darwin s clash with Christianity is winding down because modern science is a foundation of western culture and it fully accepts the truth of natural selection and the evolution of life including man It is ironic that as the struggle with Christianity declines a new struggle emerges the battle over racial differences Liberalism evolved into radical egalitarianism as it swept over America creating an authoritarian political correctness that contradicts our Constitution Modern genetics now threatens the liberal myth of human equality These Darwinian conflicts are playing out amidst our culture wars a battle that could transform us into another Brazil Radical egalitarianism and multiculturalism are ideologies aimed at dismantling our great Anglo European tradition Forces of erosion are at work which may make our nation s greatness a faint memory The battle with creationism is essentially over in Europe and it is winding down in the U S Science always wins fights over the facts of nature Eddies of ignorance will persist in American society where fundamentalism exists but educated elites have long since agreed with Darwin Liberal relativism erodes our standards of excellence and even undermines our Christian morality a morality that seems closely connected to our moral instinct With

their power in academia liberals will submit to white guilt as they treat blacks as eternal victims distorting reality to make outcomes equal Darwin however may be vindicated on the matter of real racial differences causing agony among idealistic liberals who must relinquish their lofty dreams Scientific humanism has always touted critical thinking as a supreme goal of education but it is threatened by the irrational side of liberalism that savors post modern subjectivism Today we see diversity training imposed on young people in a Stalinist manner Propaganda and groupthink are current weapons of the PC martinets In reading this survey of how Darwin came to his dangerous ideas you may appreciate how important science and critical thinking are in a society gripped by wayward versions of liberalism Both evolution by natural selection and racial differences are discussed in this book in order to illumine Darwin s two dangerous ideas one that threatened Christianity and one that now threatens liberal humanism s egalitarian dream Social scientists will be exposed as propagandists for radical egalitarianism rather than as true scientists The movement to eliminate the word race is evidence of political motivation rather than scientific honesty To examine the conflicts related to Darwinism the book includes a brief treatment of Darwin s life and works the battle against creationism the case against supernaturalism a brief survey of human evolution and a review of current issues bearing upon human nature and race Open debate over this book will be a healthy antidote for the fearful silence in America I hope you engage in this debate and send me any comments or criticisms at Njtjrt@aol.com
