Evolution Of Higher Consciousness:

Evolution of the Higher Consciousness Pablo Sender,2022-10 Who are we What is the purpose of life How do we actualize our potential These are questions that thoughtful people have asked since time immemorial Evolution of the Higher Consciousness is a comprehensive study of the teachings of H P Blavatsky on these issues Madame Blavatsky cofounder of the Theosophical Society was the pioneer of the esoteric renaissance that took place at the end of the nineteenth century Ever since her writings have served as a foundational source for modern spirituality In his book Pablo Sender presents Blavatsky s profound but frequently puzzling statements systematically and in clear concise language He throws light on the nature of our spiritual essence its evolutionary unfoldment and the work that we can do in daily life to consciously participate in this cosmic journey The first part of the book examines the metaphysics and philosophy of the human constitution and consciousness It offers a fresh and profound paradigm for understanding oneself and the purpose of life The second part focuses on the practical application of this esoteric worldview It offers powerful exercises that lead to self knowledge through meditation and awareness of everyday activities This unique combination of metaphysical insight and daily practice enables the reader to gain a deeper perspective on life and to bring spirituality to the mundane *The Evolution of Higher*

Consciousness: A Study in the Evolution of the Human Mind Richard Maurice Bucke,1948-01-01 WHAT is Cosmic Consciousness The present volume is an attempt to answer this question but notwithstanding it seems well to make a short prefatory statement in as plain language as possible so as to open the door as it were for the more elaborate exposition to be attempted in the body of the work Cosmic Consciousness then is a higher form of consciousness than that possessed by the ordinary man This last is called Self Consciousness and is that faculty upon which rests all of our life both subjective and objective which is not common to us and the higher animals except that small part of it which is derived from the few individuals who have had the higher consciousness above named To make the matter clear it must be understood that there are three forms or grades of consciousness 1 Simple Consciousness which is possessed by say the upper half of the animal kingdom By means of this faculty a dog or a horse is just as conscious of the things about him as a man is he is also conscious of his own limbs and body and he knows that these are a part of himself 2 Over and above this Simple Consciousness which is possessed by man as by animals man has another which is called Self Consciousness By virtue of this faculty man is not only conscious of trees rocks waters his own limbs and body but he becomes conscious of himself as a distinct entity apart from all the rest of the universe It is as good as certain that no animal can realize himself in that way Further by means of self consciousness man who knows as the animal knows becomes capable of treating his own mental states as objects of consciousness The animal is as it were immersed in his consciousness as a fish in the sea he cannot even in imagination get outside of it or one moment so as to realize it But man by virtue of self consciousness can step aside as it were from himself and think Yes that thought that I had about that matter is true I know it is true and I know that I know it is true The writer

has been asked How do you know that animals cannot think in the same manner The answer is simple and conclusive it is There is no evidence that any animal can so think but if they could we should soon know it Between two creatures living together as dogs or horses and men and each self conscious it would be the simplest matter in the world to open up communication Even as it is diverse as is our psychology we do by watching his acts enter into the dog s mind pretty freely we see what is going on there we know that the dog sees and hears smells and tastes we know that he has intelligence adapts means to ends that he reasons If he was self conscious we must have learned it long ago We have not learned it and it is as good as certain that no dog horse elephant or ape ever was self conscious Another thing on man s self consciousness is built everything in and about us distinctively human Language is the objective of which self consciousness is the subjective Self consciousness and language two in one for they are two halves of the same thing are the sine qua non of human social life of manners of institutions of industries of all kinds of all arts useful and fine If any animal possessed self consciousness it seems certain that it would upon that master faculty build as man has done a superstructure of language of reasoned out customs industries art But no animal has done this therefore we infer that no animal has self consciousness *Higher Consciousness*
