Evolution Of Bipedalism:

The Evolution of Bipedalism Boni M. Forrest, 1999 *From Biped to Strider* Jeff Meldrum, Charles E. Hilton, 2004-03-31

The inspiration for this volume of contributed papers stemmed from conversations between the editors in front of Chuck Hilton's poster on the determinants of hominid walking speed presented at the 1998 meetings of the American Association of Physical Anthropologists (AAPA). Earlier at those meetings Jeff Meldrum with Roshna Wunderlich had presented an alternate interpretation of the Laetoli footprints based on evidence of midfoot flexibility. As the discussion ensued we found convergence on a number of ideas about the nature of the evolution of modern human walking. From the continuation of that dialogue grew the proposal for a symposium which we called *From Biped to Strider: the Emergence of Modern Human Walking*. The symposium was held as a session of the 69th annual meeting of the AAPA held in San Antonio, Texas in 2000. It seemed to us that the study of human bipedalism had become overshadowed by the often polarized debates over whether australopithecines were wholly terrestrial in habit or retained a significant degree of arboreality.

Lowly Origin Jonathan Kingdon, 2003. A major new narrative of human evolution. *Lowly Origin* is the best available account of what it meant and what it means to walk on two feet. First Steps: How Walking Upright Made Us Human Jeremy DeSilva, 2021-04-06. Humans are the only mammals to walk on two rather than four legs. From an evolutionary perspective this is an illogical development as it slows us down. But here we are suggesting there must have been something tremendous to gain from bipedalism.

[Sex and Cohabitation Among Early Humans](#) Rene J. Herrera, Ralph Garcia-Bertrand, 2023-02-14. *Sex and Cohabitation Among Early Humans* Anthropological and Genetic Evidence for Interbreeding Among Early Humans explores the available information regarding interbreeding among different ancestral human species. In addition it reviews evidence in support of cohabitation as well as cultural and technological interactions and exchanges among early humans, particularly Neanderthal sapiens interactions. The fields of archaeology, anthropology, genetics, linguistics and molecular evolution have provided a wealth of information on the complex processes involved in human evolution. The book will help readers develop knowledge on the complexity and multiplicity of hominins including *Homo heidelbergensis*, *Homo sapiens* and *Homo floresiensis*. Moreover the book will help them reach a greater understanding of major topics such as introgression, migration from Africa, the origin, development and extinction of Neanderthals, interbreeding between Neanderthals and humans and trait continuity. Integrates genetic, evolutionary, anthropological, archaeological, anatomical, artistic and linguistic research among other areas. Written in a simple and direct style that is accessible to readers from different backgrounds and levels of understanding. Provides an integrative and holistic overview of recent developments in research on how different interactions between ancient hominins contributed to the

First Steps Jeremy DeSilva, 2021-04-06 A Science News Best Science Book of the Year A brilliant fun and scientifically deep stroll through history anatomy and evolution Agust n Fuentes PhD author of *The Creative Spark How Imagination Made Humans Exceptional* Winner of the W W Howells Book Prize from the American Anthropological Association Blending history science and culture this highly engaging evolutionary story explores how walking on two legs allowed humans to become the planet s dominant species Humans are the only mammals to walk on two rather than four legs a locomotion known as bipedalism We strive to be upstanding citizens honor those who stand tall and proud and take a stand against injustices We follow in each other s footsteps and celebrate a child s beginning to walk But why and how exactly did we take our first steps And at what cost Bipedalism has its drawbacks giving birth is more difficult and dangerous our running speed is much slower than other animals and we suffer a variety of ailments from hernias to sinus problems In *First Steps* paleoanthropologist Jeremy DeSilva explores how unusual and extraordinary this seemingly ordinary ability is A seven million year journey to the very origins of the human lineage this book shows how upright walking was a gateway to many of the other attributes that make us human from our technological abilities to our thirst for exploration and our use of language and may have laid the foundation for our species traits of compassion empathy and altruism Moving from developmental psychology labs to ancient fossil sites throughout Africa and Eurasia DeSilva brings to life our adventure walking on two legs Includes photographs A book that strides confidently across this complex terrain laying out what we know about how walking works who started doing it and when The New York Times Book Review DeSilva makes a solid scientific case with an expert history of human and ape evolution Kirkus Reviews A brisk jaunt through the history of bipedalism will leave readers both informed and uplifted Publishers Weekly Breezy popular science at its best Science News

On the Origin of Human Masticatory Function Andrea Papini, 2025-10-01 This book outlines how the physiology of human mastication is the product of an evolutionary development that has its roots in that of the primates that were our ancestors and even earlier in that of mammals In order to understand deeply who we are we must know where we come from This book therefore highlights in a truly interdisciplinary fashion how dentistry and paleoanthropology often intersect and how knowledge about both these subjects overlap By laying anatomical functional foundations of our oral system combining dental and paleoanthropological knowledge this book offers great value to students and scholars of both disciplines *Journal of Experimental Biology* , 2008

Y. Sterling, 2025-07-04 For hundreds of thousands of

years the story of human success was the story of a unique and powerful package In what this groundbreaking book calls the era of the Bundled Ape our ancestors dominated the planet by combining analytical intelligence emotional connection and physical dexterity within a single vessel the individual human Our societies economies and even our myths were built on the assumption that the person with the idea is also the one who feels the passion directs the hands and experiences the consequences Now that bundle is coming apart In The Great Unbundling the author presents a stunning new thesis for understanding our turbulent times The true disruption of artificial intelligence is not that it s a new tool but that it is the engine of a historical process that is systematically isolating each of our core functions improving them beyond human capacity and rendering the original human package obsolete This unbundling is being driven at a breakneck pace by the relentless profit seeking engine of modern capitalism which sees in AI the ultimate instrument for maximizing efficiency The evidence is everywhere The Unbundling of Labor Generative AI is poised to automate or degrade the work of 300 million full time employees striking at the heart of the knowledge economy from law and finance to journalism and medicine The Unbundling of Intelligence For the first time raw problem solving capability is being divorced from conscious understanding An AI can pass the medical licensing exams without knowing what it means to heal or ace the bar exam without a concept of justice forcing us to ask what expertise truly means The Unbundling of Connection In an age of profound loneliness AI is stepping in to meet our most fundamental needs With AI companions parasocial relationships and algorithmically curated communities emotional fulfillment is being unbundled from the messy unpredictable and deeply rewarding work of human to human connection What happens to a species whose core evolutionary advantage has been deconstructed and outsourced What is the economic value of a human being in a world where our bundled skills are no longer competitive This leads to the crisis of humanism itself and forces us to consider radical solutions like Universal Basic Income not as a political choice but as a potential civilizational necessity in the face of a useless class But this is not another prophecy of doom The unbundling is not an endpoint but a turning point The Great Unbundling is the first book to chart the powerful counter current that is rising in response The Great Re bundling This is the story of the conscious human effort to forge a new purpose From the new artisans who are building thriving businesses on the very integrated authentic human skills that AI cannot replicate to the political movements and policymakers fighting to subordinate this new technology to human values a new path is being forged The Great Unbundling is a profound deeply researched and ultimately hopeful guide to the most important transition of our lifetime It provides the essential framework for understanding the forces reshaping our world and offers a stirring vision for how we can actively create our future This provocative and insightful work argues that we are at a civilizational crossroads We can either passively accept our unbundling or begin the conscious creative and difficult work of forging a new human purpose Essential reading for aficionados of Yuval Noah Harari Nick Bostrom and Kai Fu Lee The Great Unbundling is sure to spark debate and will forever change how you think about the future of humanity [Integrative Paths to the Past](#)
