The Protection of Geographical Indications in China Xinzhe Song, 2021-11-23 For some time now there has been conflict concerning the role in the global marketplace of certain agricultural or handcrafted products of specific geographical origin: whether they should come under trademark law as favoured by common law countries such as the United States or under the geographical indications GI system developed in France and subsequently promoted by the European Union EU. At this moment China is in the eye of the storm. Taking fully into account the legislative and judicial gaps in China's compromised embrace of the GI concept, this book shows how the Chinese case brings to prominence fundamental issues relating to the functional dissimilarity between trademarks and GIs, the treatment of the terroir concept, the role of GIs in rural development and the challenges of adopting the French and European model in other countries, especially in East Asia. Providing detailed information on how GIs are registered, protected and managed in China, France and the EU, the book includes such practical analysis as the following comparison between the Chinese and European GI systems to highlight differences in essential elements for GI registration and protection: mistakes and errors arising from forcing the GI function into trademark law, the increasingly larger scope of EU GI protection, protection of collective marks containing GIs and the extension of GI protection to handicrafts, who is responsible for the protection of each registered name and who can sue for infringement, and legislative options for future GI protection in China. Recognizing not only that GIs protect consumers against fraud and producers against unfair competition but also that the goals include the preservation of rural development, cultural heritage and traditional knowledge as well as environmental and ecological protection, this book provides a comprehensive reference on legal tools available for policymakers, legal practitioners, researchers and local producers concerned with GI or trademark issues in China, France or the EU. It will prove greatly helpful to corporate lawyers filing international registration applications and taking legal action. It will also be of inestimable value to officials in a variety of countries that are considering developing or improving systems to enhance the value of terroir products and to academics interested in
