Response to Intervention Model Joseph Bradley Brumfield, 2011 Response to intervention RTI is described as the practice of providing high quality instruction and intervention that is matched to student need frequently monitoring student progress and using that data to inform decision making RTI is often used to identify students with learning disabilities However it is suggested that one of the greatest potential benefits of RTI is to meet the instructional and behavioral needs of at risk students This study examined the extent to which four leadership characteristics associated with principals roles and related to RTI implementation were exemplified along with the degree to which they were present in Mississippi secondary schools To measure this the researcher developed an instrument based upon Spiegel s 2009 framework and conceptualized within the constructs described in Glover and DiPerna 2007 Partial abstract *ERS Spectrum*, 2007 **Response to**

Intervention (RTI) in Secondary Schools Pam L. Epler-Brooks, 2015 This qualitative collective case study researched how the Response to Intervention RTI service delivery model was used within the secondary educational environment in two Ohio schools Areas researched included the type of professional development used to introduce and sustain RTI the amount of administrative support the use of universal screenings the type of data collected and the instructional strategies used at each tier Three teachers and one school counselor were interviewed using open ended questions classroom observations were conducted and state and student report cards were evaluated for this study The population included a rural school with approximately 750 students in Grades 7 12 and a suburban school with 1 450 students in Grades 9 12 Both schools scored excellent on their state report card for the 2009 2010 school year and each school used a four tiered model of RTI The findings concluded that at both schools Tier I interventions were conducted within the regular classroom by the general education teacher and Tier IV interventions were used for special education services For Tier II in one school the general education teachers attempted different interventions while at the other school content area teachers provided tutoring

through a special study hall For Tier III at one school the students were sent to a reading specialist while at the other school students received tutoring assistance in the content areas and with study skills For the two schools researched the RtI service delivery model was successful This research implies that RTI can be used within the secondary educational learning environment but that each school is going to have to look at its resources and devise a plan that best fits the school or school district This research also implies that more studies need to be done on this topic to determine whether RTI can make a difference in closing the achievement gap
