*Integrative Sport and Exercise Nutrition* Ian Craig, Justin Roberts, 2025-09-17 *Integrative Sport and Exercise Nutrition A Health Feeds Performance Perspective* defines health as an underpinning requirement for active pursuit and sporting performance By focusing on the empowerment of scientists and practitioners who support such individuals this new textbook powerfully disseminates academic and experiential knowledge in a thoroughly applied context The prevailing paradigm that has existed within the academic enquiry of sports nutrition has typically viewed macronutrients as fuel for exercise endeavours While this notion provides a basis of quantitative nutritional support what happens when our active individual

lacks adequate digestive health to assimilate these foods and in the process creates an inflammatory tone in their body And what happens when our aspiring athlete is genetically not suited to the diet that is prescribed by the sports nutritionist which is based merely on the energetic needs of their sport The underlying aim of Integrative Sport and Exercise Nutrition is to encourage sport exercise and nutrition professionals academics and students to embrace the physiological complexity and individuality of an exercising person This approach highlights the need to go beyond traditional macronutrient approaches dominant in this field and consider how our food impacts physiological health from an integrative body systems perspective Within the context of heavy training loads often alongside significant life stressors such practitioners can support the robust health and performance requirements of active individuals This cutting edge book thereby brings together the scientific voice of academics with the real world experience of nutrition and exercise practitioners and by doing so the authors wish to stimulate a new paradigm of thought towards integrative and personalised thinking in sport and exercise Conditioning Programs for Golf and Tennis IDEA Health & Fitness,2000 Scientific Foundations and Practical Applications of Periodization G.
