Faith And Science In A Skeptical Age:

Faith and Science in a Skeptical Age Jesse Yow, 2014 Learn how to respond to a world that seeks answers to life's mysteries through science. People remain thankful for science but they also recognize that science does not hold all the answers. In fact, they see that science can raise more questions than it answers, driving people on further quests for understanding truth and contentment. *Faith and Science in a Skeptical Age* shows Christians how to respond to a world focused on finding answers to life's mysteries by exploring current topics and their impacts on our culture. Topics covered include heaven and hell, near-death experiences, angels, demons, miracles, alien exploration, stem cell research, cloning, and more.

Science and the Bible : Volume 1 Donald B. DeYoung, 1994-06-01 The book's thirty dynamic, easy, and safe science experiments illustrate the laws of nature, teach Bible principles, and affirm God's power as Creator to kids and teens.

The Christian Science Journal, 1902 77 *Fairly Safe Science Activities for Illustrating Bible Lessons* Donald B. DeYoung, 2013-10-15 Nothing captures the attention of young people and adults like a creative object lesson. This hands-on book gives pastors, teachers, speakers, and homeschoolers 77 exciting science activities that reveal the order and grandeur of creation and encourage an appreciation of all God has made. These easy experiments illustrate the laws of nature, teach Bible principles, and affirm God's power as Creator. With catchy or unexpected results, the demonstrations make Bible truth unforgettable. The clearly explained experiments use common household objects, require little setup, and are illustrated with pictures and diagrams.

Science Confronts the Paranormal Kendrick Frazier, 2023-10-17 A Gallop poll surveyed 506 American teenagers aged 13 to 18 and discovered the following: 69% believe in angels, 59% believe in ESP, 55% believe in astrology, 28% believe in clairvoyance, 24% believe in Bigfoot, 22% believe in witchcraft, 20% believe in ghosts, 18% believe in the Loch Ness Monster. Carl Sagan has said that the wonders of real science far surpass the supposed and imagined mysteries of fringe science. Yet, as statistics show, the paranormal is still an endless source of fascination for people around the world. This collection of critical essays and investigative reports examines virtually every area of fringe science and the paranormal from a refreshingly scientific and clear-minded viewpoint. The authors are noted scientists, philosophers, psychologists, and writers. All bring to the task a determination to sift sense from nonsense and fact from fiction in an area notorious for misinformation, misperception, self-delusion, and wishful thinking. They do so in a way that highlights the differences between real science and pseudoscience. They've made special efforts first to find the actual facts behind numerous claims that have popular appeal and then to explain and communicate what scientific investigation and reasoning reveal about them. Subjects treated to incisive and entertaining examination include astrology, ESP, psychic detectives, psychic predictions, parapsychology, remote viewing, UFOs, creationism, the Shroud of Turin, coincidences, cult archaeology, palmistry, and fringe medicine. There are also explorations of the implications of paranormal beliefs for science education.
