FALLING TO EARTH

WILLIAM MORRIS

"The command module pilot (CMP), the second in command of an Apollo spacecraft, was the least understood and least appreciated crew member by the media and the general public. In *Falling to Earth*, Al Worden, CMP of Apollo 15, clearly and candidly recounts the wonder, the challenge, the triumph, and the pitfalls of flying to the moon."

—Neil Armstrong, Gemini 8 and Apollo 11 astronaut

## **Falling To Earth An Apollo 15 Astronauts Journey To The Moon:**

Falling to Earth Al Worden, Francis French, 2012-07-24 As command module pilot for the Apollo 15 mission to the moon in 1971 Al Worden flew on what is widely regarded as the greatest exploration mission that humans have ever attempted He spent six days orbiting the moon including three days completely alone the most isolated human in existence During the return from the moon to earth he also conducted the first spacewalk in deep space becoming the first human ever to see both the entire earth and moon simply by turning his head The Apollo 15 flight capped an already impressive career as an astronaut including important work on the pioneering Apollo 9 and Apollo 12 missions as well as the perilous flight of Apollo 13 Nine months after his return from the moon Worden received a phone call telling him he was fired and ordering him out of his office by the end of the week He refused to leave What happened in those nine months from being honored with parades and meetings with world leaders to being unceremoniously fired has been a source of much speculation for four decades Worden has never before told the full story around the dramatic events that shook NASA and ended his spaceflight career Readers will learn them here for the first time along with the exhilarating account of what it is like to journey to the moon and back It s an unprecedentedly candid account of what it was like to be an Apollo astronaut with all its glory but also its pitfalls

*Falling to Earth* Al Worden, Francis French, 2011 The author describes his life from his early years growing up on a farm to his years as an astronaut with NASA including flying the Apollo 15 mission to the moon in 1971

**The Last of NASA's Original Pilot Astronauts** David J. Shayler, Colin Burgess, 2017-06-19 Resulting from the authors deep research into these two pre Shuttle astronaut groups many intriguing and untold stories behind the selection process are revealed in the book The often extraordinary backgrounds and personal ambitions of these skilled pilots chosen to continue NASA s exploration and knowledge of the space frontier are also examined In April 1966 NASA selected 19 pilot astronauts whose training was specifically targeted to the Apollo lunar landing missions and the Earth orbiting Skylab space station Three years later following the sudden cancellation of the USAF s highly classified Manned Orbiting Laboratory MOL project seven military astronauts were also co opted into NASA s space program This book represents the final chapter by the authors in the story of American astronaut selections prior to the era of the Space Shuttle Through personal interviews and original NASA documentation readers will also gain a true insight into a remarkable age of space travel as it unfolded in the late 1960s and the men who flew those historic missions

**Moon Bound** Colin Burgess, 2013-03-12 Often lost in the shadow of the first group of astronauts for the Mercury missions the second and third groups included the leading figures for NASA s activities for the following two decades Moon Bound complements the author s recently published work *Selecting the Mercury Seven* 2011 extending the story of the men who helped to launch human spaceflight and broaden the American space program Although the initial 1959 group became known as the legendary pioneering Mercury astronauts the astronauts of Groups 2 and 3 gave us many household names Sixteen astronauts from both groups traveled to the Moon in

Project Apollo with several actually walking on the Moon one of them being Neil Armstrong This book draws on interviews to tell the astronauts personal stories and recreate the drama of that time It describes the process by which they were selected as astronauts and explains how the criteria had changed since the first group Moon Bound is divided into two parts recounting the biographies relating to the nine astronauts from NASA s Group 2 in the first part and the fourteen finalists in Group 3 in the second part The stories of both selection groups are narrated through the experiences of four finalists with interesting backgrounds One of these men is Al Rupp of the USAF who as a West Point cadet cheekily helped to steal the Navy mascot goat prior to the annual Army versus Navy game in 1953 thus achieving legendary status in the game s history Rupp was killed in a plane crash just two years after being named as a finalist for Group 3 The service career of naval aviator John Yamnicky was also very much the equal of other finalists but he was killed on September 11 2001 as he was a passenger on hijacked Flight 77 which was flown into the Pentagon At the end of the work there are several chapters on how these candidates were prepped for their missions

**The Greatest Adventure** Colin Burgess,2021-08-12 The Greatest Adventure explores the past present and future of the space race The space race was perhaps the greatest technological contest of the twentieth century It was a thrilling era of innovation discovery and exploration as astronauts and cosmonauts were launched on space missions of increasing length complexity and danger The Greatest Adventure traces the events of this extraordinary period describing the initial string of Soviet achievements the first satellite in orbit the first animal man and woman in space the first spacewalk as well as the ultimate US victory in the race to land on the moon The book then takes the reader on a journey through the following decades of space exploration to the present time detailing the many successes tragedies risks and rewards of space exploration

**Earth's Galactic History and Its Extraterrestrial Connection** Constance Victoria Briggs,2023-11-01 Constance Victoria Briggs who brought us The Moon s Galactic History A Look at the Moon s Extraterrestrial Past and Its Connection to Earth continues her exploration into our cosmic connections with her companion book Earth s Galactic History and Its Extraterrestrial Connection In this exciting new work Briggs examines current research theories and evidence linking Earth and extraterrestrials past and present Some of the topics that Briggs covers include whether the Earth was terraformed by advanced extraterrestrials the theory that the Earth was seeded with life by otherworldly beings possible extraterrestrial involvement in the creation of humans and more She looks at evidence of humans being visited by beings from other worlds and explores the idea that there was once a battle for Earth She brings us signs signals messages and clues showing evidence that extraterrestrials are trying to communicate with humans and takes us on a journey beneath the oceans where there is believed to be an extraterrestrial presence Briggs also investigates the possibility that other worldly beings may be residing inside inner Earth She delves into how extraterrestrials may be visiting Earth via stargates and portals using what she refers to as the cosmic freeway Briggs also examines the possibility that there are extraterrestrials living among us who they are and what their goals may be when it comes to Earth Extraordinary events

believed to be related to extraterrestrials are also revealed Briggs takes a look at current research into the UFO UAP USO phenomena detailing descriptions of these enigmatic objects and witness reports She talks about the possibility of there being an authoritative hierarchy within our galaxy that may include other worldly federations and groups that are responsible for a galactic community In the end Briggs ponders humankind s spacefaring future looking at the latest information and trends on space travel and what we have to look forward to by way of our expansive universe
