Families That Work Policies For Reconciling Parenthood And Employment:

Families That Work Janet C. Gornick, Marcia K. Meyers, 2003-08-28 Parents around the world grapple with the common challenge of balancing work and child care. Despite common problems, the industrialized nations have developed dramatically different social and labor market policies that vary widely in the level of support they provide for parents and the extent to which they encourage an equal division of labor between parents as they balance work and care. In *Families That Work*, Janet Gornick and Marcia Meyers take a close look at the work family policies in the United States and abroad and call for a new and expanded role for the U.S. government in order to bring this country up to the standards taken for granted in many other Western nations. In many countries in Europe and in Canada, family leave policies grant parents paid time off to care for their young children, and labor market regulations go a long way toward ensuring that work does not overwhelm family obligations. In addition, early childhood education and care programs guarantee access to high quality care for their children. In most of these countries, policies encourage gender equality by strengthening mothers' ties to employment and encouraging fathers to spend more time caregiving at home. In sharp contrast, Gornick and Meyers show how in the United States, an economy with high labor force participation among both fathers and mothers, parents are left to craft private solutions to the society-wide dilemma of who will care for the children. Parents overwhelmingly, mothers must loosen their ties to the workplace to care for their children; workers are forced to negotiate with their employers, often unsuccessfully, for family leave and reduced work schedules; and parents must purchase care of dubious quality at high prices from consumer markets. By leaving child care solutions up to hard-pressed working parents, these private solutions exact a high price in terms of gender inequality in the workplace and at home, family stress, and economic insecurity, and not least, child well-being. Gornick and Meyers show that it is possible, based on the experiences of other countries, to enhance child well-being and to increase gender equality by promoting more extensive and egalitarian family leave, work time, and child care policies. *Families That Work* demonstrates convincingly that the United States has much to learn from policies in Europe and in Canada, and that the often-repeated claim that the United States is simply too different to draw lessons from other countries is based largely on misperceptions about policies in other countries and about the possibility of policy expansion in the United States.

A Longitudinal Analysis of Postpartum Depression Among Employed Women Rada Kamil Dagher, 2007 Poverty,

Urbanity and Social Policy Jolanta Aldukaite, 2009 The aim of this book is to provide the reader with the broad spectrum of poverty and social policy issues in Central and Eastern Europe and address the most urgent topics of welfare state research namely poverty children and social policy gender social policy and poverty urban policy renewal and poverty and overall challenges to social policy reform The book demonstrates that despite an increase in poverty and inequalities in many Central and Eastern European countries during the last 18 years the social policy systems have not experienced a radical dismantlement throughout the entire region The post Communist welfare state still shows more comprehensive solutions to social problems than residual ones Nevertheless the deteriorated fiscal capacities of the state in some cases hinder the successful poverty solutions as well as the expansion of the welfare programmes Yet the Central and Eastern European region is very diverse regarding the scope and depth of social problems encountered and some countries have implemented more successful policy solutions than other ones Furthermore the findings of this volume demonstrate that Central and Eastern European countries are not so dramatically distinct from Western Europe neither in their social problems encountered nor in their solutions Nevertheless the experience of the socialist regime the relatively lower wages and lower social benefits as well as the higher share of GDP produced in a shadow economy allow the CEE countries to group into the distinct post Communist regime
